

TERRIFIC SMILES OF THE PALM BEACHES

Dr. Miriam Rubano introduces the new CEREC technology to design all-porcelain restorations in one visit.

“Achieving a beautiful smile is faster than ever and virtually pain-free with the innovative dentistry of Dr. Rubano.”

The Smile of Your Dreams

We are pleased to offer our patients high-quality general and cosmetic dentistry using state-of-the-art advancements and a conservative, gentle approach to dentistry. The philosophy of our office is to care for our patients, and account for each individual's concerns. We spend much time discussing the patient's dental needs prior to rendering treatment, which includes diagnostics, and optimal and alternative treatment plans with an emphasis on conservation of tooth structure.

Treatments offered include white fillings (resins), crowns, periodontal scaling and root planing, implants, root canals, fixed bridges, dentures, removable partials, porcelain veneers, and tooth whitening. We have an air abrasion unit that allows small fillings to be done without the need for anesthesia, needles, etc. We also offer patients the option of oral, conscious sedation for dental treatment. Dentistry is more comfortable than ever with these advancements.

Dr. Miriam Rubano uses technologically advanced diagnostics to aid in both early and accurate diagnosis. Digital radiography decreases the radiation exposure from conventional X-rays. A computerized, periodontal soft-tissue management probe aids in periodontal disease detection. For hygiene appointments, we use a state-of-the-art piezo-electric scaler and irrigation unit that delivers fluoride and other medicaments to prevent decay and periodontal breakdown. Prevention is key before a problem arises.

Our office is amalgam-free — no ugly metal fillings — as we use tooth-colored resins to closely match your natural tooth. For superior tooth-colored restorations, we offer computer-aided design (CAD) by CEREC to fabricate all-porcelain restorations in one hour, so multiple visits and temporaries are not needed. CEREC delivers the results you need, from simple fillings to full crowns to veneers, in a single appointment.

To make teeth their natural whitest, we recommend BriteSmile One-Hour whitening. Get smiles that are the whitest and healthiest, and last for years, with BriteSmile. The BriteSmile system utilizes a patented, soft blue light to whiten your teeth.

Patients are our No. 1 priority. Our goal is to provide every patient with treatment that is custom-tailored to his or her needs. We offer appointments on weekends and evenings to accommodate your schedule. We also accept most insurance policies and offer financing plans. Please feel free to call our office for a complimentary consultation so you can have the smile of your dreams!
